

BASIC RAIL FENCE

The finished block should measure 6 ½ inches including a seam allowance of ¼ inch.

To make a single basic block you will need:

A 2 ½ inch wide by 44" long strip of the following values:

2 Dark

1 Light

Piece the long strips together to form a 44" long x 6 ½" wide strip to cut six 6 ½" blocks from using the strip piecing and cutting method.

Bring all six blocks to the meeting in March and they will be mixed and matched to form the hospice quilts.

There is no color scheme to this project, only values. If you have dark green and light yellow, by all means use them. Our goal is to make these quilts cheerful so that the patients will feel a smile in their hearts when they use them.

If you are unable to make the March meeting but would like to contribute blocks to the project, you may either send them with a friend or mail them to:
